Lab Task 01 – Adobe Dreamweaver and First Web Page

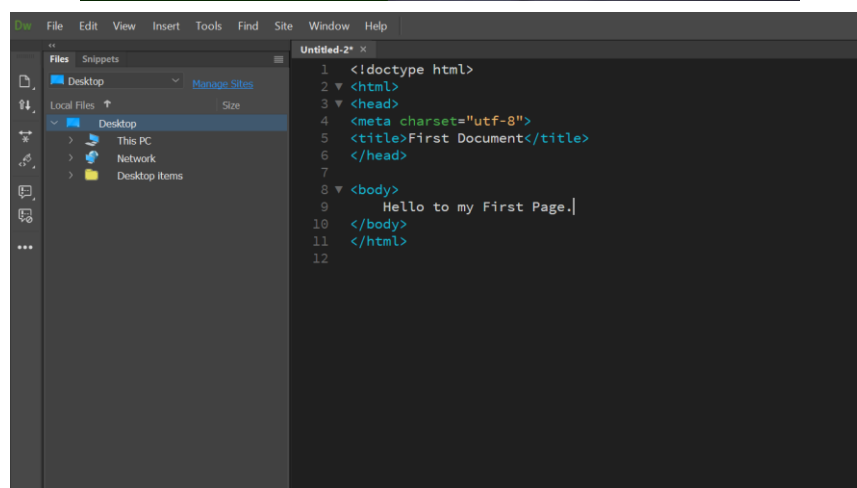

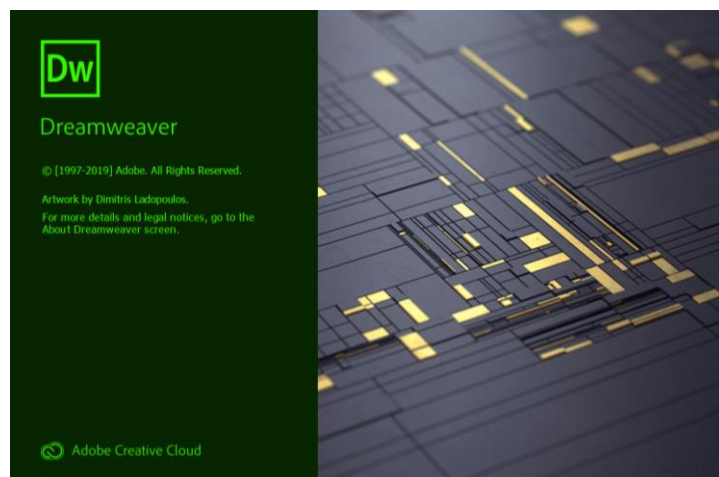

The purpose of this lab is to give you the overview about a web development tool: Adobe Dreamweaver and different features of the tool. Also, this lab includes the introduction to the basics of HTML tags.

Question 01:

Adobe Dreamweaver is the ideal tool for building your website. Dreamweaver is a popular program among professional web designers, as well as people who want to build sites for their hobbies, clubs, families, and small businesses.

- Download Adobe Dreamweaver from the official website.
- Install and configure the application.
- Launch the application.

Final Output:

Question 02:

Create a new HTML file in Adobe Dreamweaver. Write the code to display your Name, CMS ID and Department in different colours. Use the **Split** view of Dreamweaver to display the output of the code in Dreamweaver.

Final Output:
