Lab Task 02 – Basics of HTML

The purpose of this lab is to get you in touch with the basics of HTML. These include the use of tables, styling, hyperlinks and images in a web page.

Question 01:

Create an HTML file in Adobe Dreamweaver and write the code to create a table such that it is displayed as the one shown in the output. You have to add styling and spanning elements to the table for this purpose.

[Final Output:](#)

	1	2	3	4	5	6	7	
1	A			B				1
2								2
3	Bilal Khan							3
4	CMS: 12345					E		4
5						F		5
	1	2	3	4	5	6	7	

Question 02:

Create an HTML file in Dreamweaver and write the code to create a table such that it is displayed as the one shown in the output. You have to add hyperlinks, images, spanning and sub-table within the table.

[Final Output:](#)
